

Frontiers in Metasurfaces and Terahertz Photonics

14 – 15
February 2025

The primary aim of SPARC is to provide a platform for bringing together experts and students from the field of “Metamaterials and Terahertz Photonics” in an effort to highlight novel contributions, discuss challenges, and motivate innovation in the field of Photonics.

Speakers

Prof. Ranjan Singh

University of Notre Dame,
USA

Prof. Junsuk Rho

POSTECH, South Korea

Prof. Shailendra K. Varshney

IIT Kharagpur, India

Prof. Tapajyoti Das Gupta

IISc Bengaluru, India

Prof. Gagan Kumar

IIT Guwahati, India

Few more to be added soon

We invite you all to the SPARC Workshop on Metamaterials: Covering visible, infrared, terahertz and beyond under SPARC and co-organized by IEEE Photonics Society, to be held during February 14-15, 2025 at Indian Institute of Technology Guwahati. The two-day event will involve talks by eminent speakers from the field of metasurfaces and terahertz photonics. The event will also include laboratory visits and training with the electromagnetic simulations software useful in designing meta-devices and few hands' on experiences

Interested participants can register for this event using the link below.

Registration Details

Registration Fee: Rs 600 /-

(Inclusive of participation, tea, lunch and Dinner)

Registration Deadline – 31 January, 2025

For registration and other details, please visit: <https://www.iitg.ac.in/clubs/ssphotonics/FiMTP-2025.html>

Note: Registration is mandatory for participation. Certificates will be provided to registered attendees

Organizers:

Prof. Gagan Kumar

Department of Physics, IIT Guwahati

Prof. Shailendra Kumar Varshney

Department of E&ECE, IIT Kharagpur
