

Precision in photonics. Together we shape light.

Optical Frequency Combs for Precision Metrology

- stability on the 10^{-20} level
- spectral purity transfer, optical clocks

Ultrastable Laser Systems Frequency Stabilized at Any Wavelength

- best-in-class phase noise & frequency stability
- reliable, automated, 24/7 turnkey operation

Femtosecond Fiber Lasers from Visible to Mid-IR

- multicolor synchronized outputs
- stabilization & synchronization

THz Time Domain Solutions for Non-Destructive Testing

- compact OEM engines for NDT
- modular approach for configurations
