Technical Sessions & Poster Presentations for Researchers, Academicians, Industrialists & Students

North-East Research Conclave (NERC-2022)

Research and Development is one of the foundational pillars for holistic growth of the country specially for a fast-developing nation like India. The dynamicity of our nation is a collaborative effort of all the states. However, in recent years the North-East states are coming to the limelight for excellent laurels in innovation and collaborations in the field of science & technology. The North-Eastern Region (NER) comprising the Seven Sister States along with its only brother Sikkim, is one of the most decorated jewels in the crown of the Nation and also one of the most strategically important regions of the country.

Overcoming the challenges is of utmost priority for exponential developmental growth of this region for which many educational and research organizations, have been engaged in cutting-edge research. Therefore, the urgent need is to bring all the research, innovation ideas and most importantly, the human resource onto a common platform.

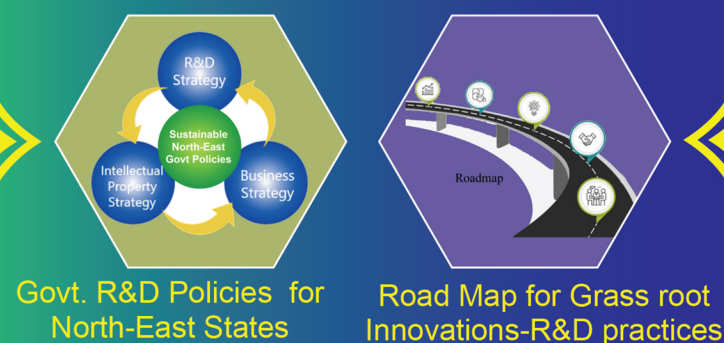

Indian Institute of Technology Guwahati, since its inception, has steadily grown to be the ambassador of Research and Development in North-East India. The Institute is playing the key role in providing leadership in translational research and making the North-East to achieve a prominent position in the global platform.

As India marks 75 years of independence and celebrates Azadi Ka Amrit Mahotsav, Indian Institute of Technology Guwahati proposes to organize "The North-East Research Conclave". Participants are requested to access the web page given below.
