2nd year,ECE

Post contesting for :UG SENATOR

AGENDA

- 1) I would propose the formation of a new club to help students prepare for their entrance exams and service commissions and co-ordinate with the Centre for Career Development.
- 2) I would like to improve the counselling cell by making it available to students in their free time rather than the current timing that clashes with class hours and have a good mentorship programme there by letting the smooth transition of freshmen into the system.
- 3) I would work in tandem with all the boards and try to improve the basic amenities in the hostels.
- 4) I would propose for a centralized rent-based cycle system.
- 5) I would improve the basic facilities present in our hospital like installation of machines to check eye sight.
- 6) I would propose the formation of a committee to supervise the establishment of a waste management plant by running a trial process.
- 7) I would like to propose an option for students to change their SA course (NCC/NSO/NSS) after one semester.
- 8) I would work towards a cleaner campus by imposing a more stringent trash-collection system and organizing awareness campaigns through the Welfare Board.
- 9) I would propose for good safety measures at the boundaries like proper fencing for cricket ground near the technology complex, path between K V gate and Brahmaputra hostel.
